

JERRICK JOHNSON

Software Engineer II | IBM i • RPGLE • CL/CLLE • SQL • Full-Stack Development

Forney, TX | [linkedin.com/in/jerrick-johnson-6bbba182/](https://www.linkedin.com/in/jerrick-johnson-6bbba182/) | github.com/JerrickJohnson

PROFESSIONAL SUMMARY

Software Engineer II with professional experience developing and maintaining enterprise insurance applications on the IBM i platform. Experienced in RPGLE, CL/CLLE, and SQL, with a focus on application development, data and file modifications, production troubleshooting, business reporting, and print/document solutions. Experienced with DocPath Designer and the company's ALP print environment, including RPG printer-file/O-specification development, spooled-file generation, document formatting, and downstream print processing for insured documents. Additionally trained in modern full-stack web development through Southern Methodist University's Full Stack Web Development program, with hands-on experience building applications using JavaScript, React, Node.js, Express, GraphQL, MongoDB, and MySQL.

TECHNICAL SKILLS

Enterprise Development: RPGLE / RPG • CL / CLLE • SQL • IBM i / iSeries • Application Development • Production Troubleshooting • Application Maintenance

Database & Data: SQL • IBM i Files • Data Modification • Data Processing • Business Reporting

Document & Print: DocPath Designer • ALP Print Environment • RPG O-Specifications • Printer Files • Spooled Files • Form Development • Document Processing • Data Field Integration • Printed Insurance Documents

Full-Stack: JavaScript • HTML • CSS • React • Node.js • Express.js • GraphQL • Apollo • Handlebars

Databases & Tools: MySQL • MongoDB • Mongoose • Sequelize • REST APIs • Git • GitHub • Bootstrap • Multer • Socket.io

PROFESSIONAL EXPERIENCE

CRC Group / Wellington Insurance Group — Software Engineer II | September 2021 – Present

- Develop, enhance, and maintain enterprise insurance applications using RPGLE, CL/CLLE, and SQL on the IBM i platform.
- Develop and maintain CL and RPGLE programs using SQL to generate scheduled business reports and distribute recurring reporting to users.
- Develop monthly new-business reports for newly issued policyholders.
- Troubleshoot and resolve production application issues, investigating program logic, processing flows, files, and data to identify and implement solutions.
- Modify existing applications and files to support changing business requirements, including adding new data and application functionality.
- Develop and maintain print and document-processing solutions using DocPath Designer, including importing forms, editing layouts, adding fields, and integrating forms with RPGLE programs.
- Develop RPGLE programs that process business data and provide the information required to populate DocPath forms and printed insurance documents for insureds.
- Develop and maintain the company's ALP print workflow, using RPG O-specifications and printer files to generate formatted output and spooled files for downstream print/document processing.
- Troubleshoot print output and formatting issues across the IBM i application, spool-file, and document/print-processing workflow.
- Add and maintain data for new companies within Wellington's print environment and develop new programs to produce the associated printed documents.
- Developed functionality allowing business users to assign Catastrophe (CAT) codes to Texas counties and regions, enabling users to manage CAT-code assignments within the application.
- Support application testing, debugging, data changes, and implementation of application enhancements within an established enterprise insurance environment.

SELECTED ENGINEERING PROJECT

Texas CAT Code Assignment Functionality

CRC Group / Wellington Insurance Group — Developed functionality that allows business users to assign Catastrophe (CAT) codes to Texas counties and regions. Implemented application and data changes required to support the business process and provide users with the ability to manage CAT-code assignments.

Technologies: RPGLE • CL/CLLE • SQL • IBM i

SELECTED FULL-STACK PROJECTS

Premier Neighborhood Services

Developed a full-stack community/HOA management application with user authentication, marketplace, messaging, events, HOA services, dues/payment functionality, and client/server components.

Technologies: React • Node.js • Express • GraphQL • Apollo • MongoDB • Mongoose

Homeward Bound

Developed a web application focused on helping users with lost and found pets.

Technologies: Handlebars • Express.js • Node.js • Sequelize • MySQL • Multer • Sharp

React / GraphQL Marketplace

Developed a React-based marketplace using GraphQL and Apollo for client/server communication, with authenticated user functionality and product/category management.

Technologies: React • GraphQL • Apollo • Node.js • Express • MongoDB • Mongoose

EDUCATION

Southern Methodist University — Full Stack Web Development Certificate Program

Full-stack web development program with hands-on application development using modern client-side and server-side technologies, databases, APIs, and application architecture.

North Mesquite High School — High School Diploma | 2007

ADDITIONAL PROFESSIONAL EXPERIENCE

United 1 Labs — Compounder | November 2020 – 2021

Prepared batches of raw materials; maintained production documentation and logbooks; performed equipment cleaning and sanitization.

Sentinel Land Services / Rivercrest Resources — Petroleum Landman | October 2018 – October 2020

Researched mineral ownership; entered and maintained ownership data using Excel and Access; created Mineral Ownership Reports.

Aloe Vera of America — Compounder | October 2011 – October 2018

Followed established recipes and processes; mixed raw materials while monitoring heating, cooling, and pressure; worked with R&D; on batch sheets and product formulas.
